

77 Gallo message (left on 374-5437 tape) 25 MAR 92

Keystone Meeting until Friday

301-496-6007

301-469-6317 Home

I really want to talk to you about
What I believe must be really honest
differences of either interpretation or total
knowledge. I'm really well aware of the
serology data that you gave for me to
look over on one occasion during the
visit of CDC to Pasteur. I am aware
of that happening. I am not aware
that that solves ^{etiology} ideology data w/o backing,
virus isolation ~~or~~ w/o reproducibility
OK of the serology w/o confirmation
that that serology ~~is~~ really, really is
specific antibodies as we now know is
required by Western Blot w/ as I knew
since Feb. of '84. I really want to talk
... I think it.. before this escalates into
a real legal issue w/ that's going to
be unpleasant I think you're treating
me very, very unfairly & cruelly @
this stage. You really cannot know all
the facts or you are misrepresenting
them. I have a long testimony from

Kally? in writing, legal that bears a lot on
your actions & either we talk this
over man to man once & for all or I
have to move in a different direction. I
also have your records from CDC as of late
March 1984 ^{in your memos} where you deny any linkage of
LAV to AIDS. I think its time we
need to have a talk, Don, in a friendly
open way cause I know we both have, well we
have mutual friends & people that ^{would} wish
we are talking. You are doing an overkill
for reasons of animosity that are beyond
my comprehension. I don't wish you harm. I
still don't wish you harm, & I don't know
what's motivating you. I don't know what
motivated you to take notes on the telephone
~~to take notes or record one year ago.~~ I
never made a stink about it when I WAS
talking to you privately in records that you
then released to other people. That, too, in
my regard is rather... mean spirited. ^{Both were}
I thought you & I had gone by there. ^{X'ED of the}
Again, I would appreciate hearing from you ^{post}
before going I go to Keystone or perhaps
call me there. thanks.
