Dr. Jay Levy  
Room 1282-M  
Cancer Research Institute  
University of California Medical Center  
San Francisco, CA 94143

Dear Dr. Levy:

This preprint describes our comparison of HTLV-III, LAV, and ARV. We would appreciate your critical review - anything short of jettisoning the whole project. Marty has worked too hard. I am sending this to Gallo and the French - and am holding my breath!

Best regards from the home of SAIDS (and AIDS).

Sincerely,

Murray B. Gardner, M.D.
